PROJECTS

Design and Implementation of a UTM System

(July 2024 - June 2025)

Designed and developed a Unified Threat Management (UTM) system integrating firewall, proxy, VPN, and packet inspection to monitor, analyze, and secure network traffic in a Linux environment.

Internship (In-house, B. Tech)

(May 2024 - July 2024)

Optimization and Implementation of Sorting Algorithm (Merge Sort) in GPU environment using CUDA Programming Language.

EDUCATION

Master of Technology, NIT Jamshedpur

(Aug. 2025 - June 2027)

Computer Science & Engineering
CGPA - 7.37

Bachelor in Technology, IIST Shibpur

(Dec. 2021 - June 2025)

Computer Science & Technology
CGPA - 8.42

Higher Secondary, WBCHSE

(July 2018 - April 2020)

Bengali, English, Mathematics, Physics, Chemistry and Biology
Percentage - 96

TECHNICAL SKILLS

- **JavaScript, Node.js and React.js** - Building scalable backend services and interactive frontend applications.
- **C and C++** - Strong fundamentals with hands-on experience in socket programming and low-level system concepts.
- **SQL** - Designing and querying relational databases with strong knowledge of joins, indexing, and data manipulation.
- **Data Structures and Algorithms** - Strong problem-solving skills with efficient implementation of core data structures and algorithmic techniques.
- **Python** - Strong fundamentals with experience in Machine Learning and Deep Learning concepts and implementations.
- **Linux** - Proficient in command-line operations, system configuration, networking, and shell scripting fundamentals.

Languages

- **English** - Professional working proficiency
- **Bengali** - Native proficiency
- **Hindi** - Basic proficiency
